GREETINGS

FROM THE PRESIDENT

Dear Valued Partner,

We're excited to share with you the latest edition of our WSI Product Catalogue, thoughtfully created with you, our trusted partners, in mind. We hope this becomes a valuable tool in supporting your daily operations and business growth.

This catalogue offers a quick view of the brands we carry, classified by application for easy reference. Each brand is featured to provide essential details on its origins, the solutions it offers, and the specific products available under its name, helping you quickly identify which ones best align with your operational needs. We have also included information about our other value-added services to further support your business.

To make navigation even easier and ensure you have the most up-to-date information, we've included QR codes so you can download the latest edition.

Thank you for your continued partnership with WSI — because our business is to grow your business.

Warm regards,

A handwritten signature in black ink, appearing to read 'Juan G. Chua'.

Juan G. Chua
President

WSI Through the Years

A Story of Growth, Grit, and Giving Back

From a modest beginning to becoming a trusted name in tech solutions, WSI's journey has been one of resilience and reinvention.

When the pandemic hit, like many businesses, we faced uncertainty. But instead of slowing down, we leaned in. We adapted quickly, shifting to remote work, supporting our clients through digital transformation, and keeping our team connected and motivated. It wasn't easy, but it made us stronger.

It became increasingly clear that our resellers are not just part of our business, they are the very core of our existence. This industry is as vibrant as it is today because of their incredible strength, hardwork and dedication. We truly value the expertise they bring to the markets they serve, and we're proud to stand alongside them. Their support and partnership played a vital role in sustaining our success, even during the most challenging times.

One of our biggest leaps we've taken was going digital in 2020. We launched WeSellIT, our official e-commerce platform, making it easier for customers to browse, shop, and access tech solutions online. It was a bold move, but one that opened exciting new doors for growth and deeper customer engagement.

As the world changed, so did we. We expanded our product portfolio, bringing in smarter, more secure, and more efficient solutions to meet the evolving needs of businesses. From software to cybersecurity, we made sure our offerings stayed relevant and impactful.

But growth wasn't just about products—it was about people. We welcomed fresh talent, nurtured our teams, and created meaningful opportunities for learning and leadership. We stood by our partners with empathy and expertise, building trust through shared goals and celebrated milestones. Even in challenging times, we stayed true to our values. Our culture of commitment, to empowering people, strengthening partnerships, and driving impact continues to be the foundation of our success.

And through it all, we never forgot to give back. Supporting charities and community initiatives has always been part of our DNA. Whether through donations, outreach programs, or volunteer work, we continue to share our success with those who need it most.

WSI isn't just a company—it's a community. And as we look ahead, we remain committed to growing with purpose, serving with heart, and making a difference wherever we can.

WHO WE ARE

Wordtext Systems, Inc. (WSI) is leading value-added IT distributor in the Philippines established in 1982, delivering world-class hardware and software solutions from leading global brands.

WSI also offers specialized technical services to ensure businesses get the most out of their IT investments. Our Technical Center serves as the authorized service and repair hub, providing diagnostics, maintenance, and genuine parts replacement to keep systems running at peak performance.

Complementing this, our Professional Services team delivers end-to-end support, from installation and configuration to troubleshooting and optimization, so clients can focus on their core business while we handle the technical details.

Guided by our motto, "Our business is to grow your business," we go beyond simply providing products, we empower organizations to thrive in today's digital era by offering technology that drives efficiency, security, and growth.

Make Meetings Wireless

ASTROS App

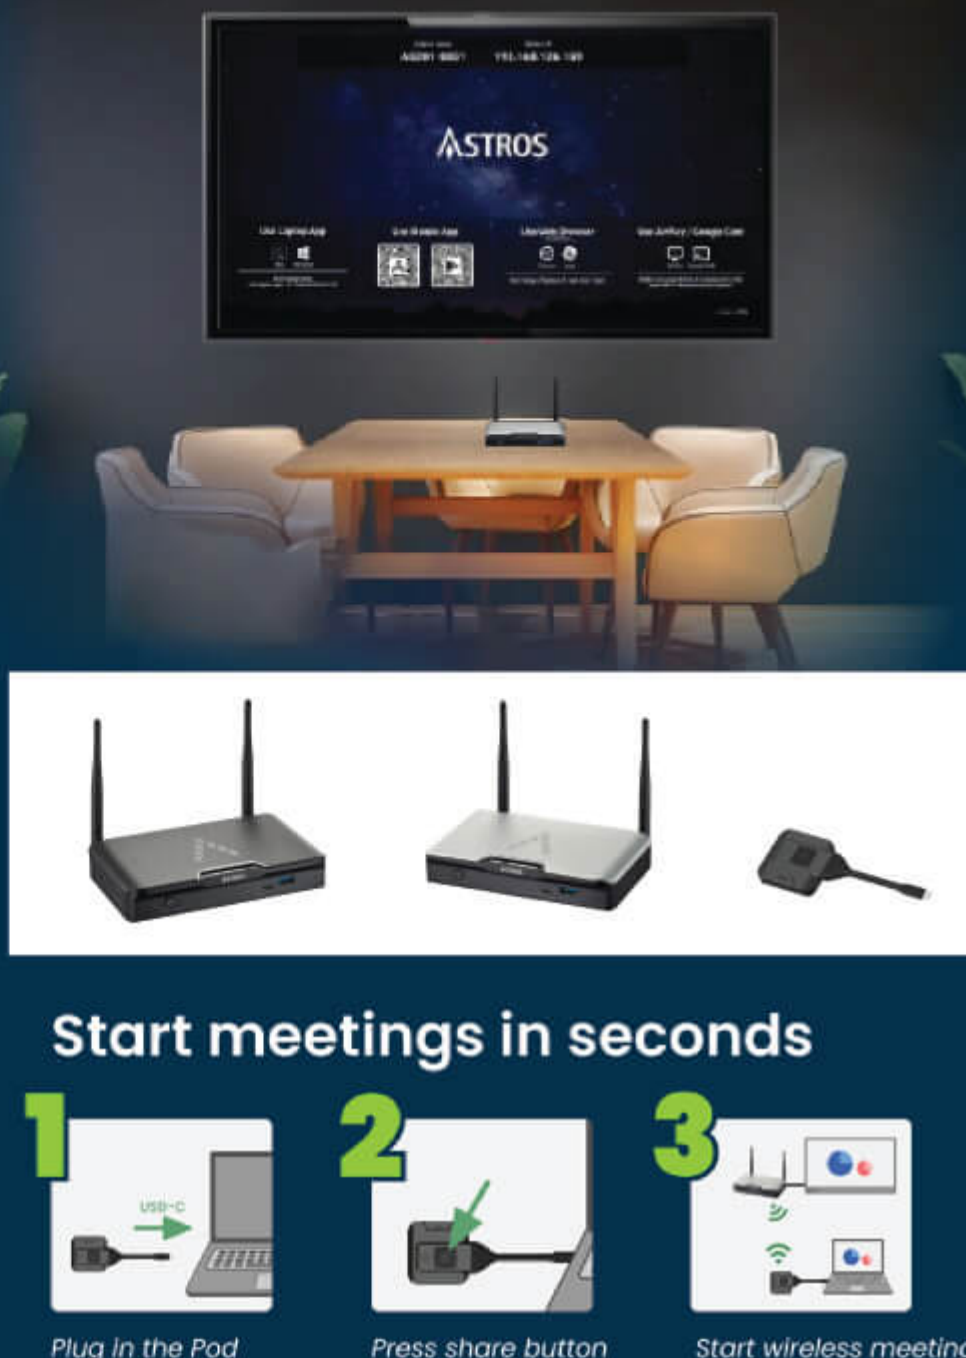

A feature-rich application for enhanced functionality.

Native Protocols

Support for AirPlay, Google Cast, and browser sharing.

ASTROS Pod

A driverless, plug-and-play device for quick and hassle-free sharing.

Start meetings in seconds

ASTROS

Astrogate was founded in 2019 in Taiwan with the mission to make collaboration effortless through wireless technology. The name combines "Astro" (symbolizing limitless possibilities) and "Gate" (a portal for seamless connectivity), reflecting its vision of enabling creativity and innovation in every meeting space.

Astrogate's flagship solution is ASTROS, a wireless presentation and conferencing system designed for BYOD (Bring Your Own Device) and BYOM (Bring Your Own Meeting) environments. Key components include the ASTROS Station (AS-101 & AS-201), a central hub that connects displays and peripherals for seamless meetings; the ASTROS Pod, a plug-and-play device enabling instant screen sharing without software or network setup; and the ASTROS App, which enhances collaboration with features like screen sharing, remote viewing, annotation, and content moderation.

WE MAKE TECHNOLOGY THAT MAKES A DIFFERENCE

AVer

AVer Information Inc. was founded in 2008 in New Taipei City, Taiwan, as a spin-off from AVerMedia Group to focus on education technology and business communication solutions. Since then, AVer has grown into a global leader in visual collaboration and EdTech, with operations worldwide and a strong commitment to innovation, quality, and sustainability.

Product Lineup:

- Mobile device charging carts
- HD video conferencing systems
- USB and AI-powered PTZ cameras
- Conference cameras
- Interactive flat panels

The Scalable Meeting Platform. Simply meet with Pexip.

] pexip[

Pexip

Was founded in 2012 in Oslo, Norway by Michel Sagen, Tom-Erik Lia, Håkon Dahle, and Simen Teigre. It emerged from Norway's "Video Valley" ecosystem after Tandberg's acquisition by Cisco and later merged with Videxio in 2018. Pexip is serving global markets with secure and scalable video conferencing solutions, offering a secure, interoperable video collaboration platform with flexible deployment options (self-hosted, private cloud, or as-a-service).

Core Solutions:

Pexip Meetings:	Designed for secure environments and custom integrations.
Pexip Connect:	Enables interoperability between major platforms like Microsoft Teams, Zoom, and Google Meet.
Flexible Deployment Options:	Self-hosted, private cloud, or as-a-service models to meet security and compliance needs.
Industry-Specific Solutions:	Enterprise: Seamless global collaboration with secure file sharing and real-time communication.
Integration Partnerships:	Supports Zoom Rooms joining Teams meetings and Teams Rooms joining Zoom/Webex/Google Meet with one-touch simplicity.

RICOH
imagine. change.

Ricoh originated in Tokyo, Japan, founded by Kiyoshi Ichimura on February 6, 1936. The company began as Riken Sensitized Paper, a business focused on selling photographic paper and operating as a commercial division of the Institute of Physical and Chemical Research (Riken).

As the company expanded, it was renamed Riken Optical Co., Ltd. in 1938 to reflect its growing capabilities in optical and imaging technology. In 1963, following significant sales achievements, the company officially adopted the name Ricoh Company, Ltd., marking its transformation into the global technology brand known today.

Product Lineup:

- **Office Printing Solutions** - Black and white printers, color printers, multifunction printers (MFPs)
- **Document Scanners:** Fi Series, SP Series
- **Commercial & Industrial Printing:** Pro Series
- **Visual Communication & Collaboration:** Interactive whiteboards, projectors
- **Digital Workflow & IT Services**

Yealink

Yealink is a leading global provider unified communication & collaboration solutions specialized in video conferencing, voice communications, and collaboration, dedicated to helping every person and organization embrace the power of "easy collaboration, high-productivity".

Yealink ranks no. 1 in the global market share of IP phone and is the top 5 leader in the conferencing market (Frost & Sullivan, 2021).

Product Lineup:

- Audio Visuals (AV)
- Headset
- IP Phone
- Management Platform
- Microsoft I Zoom Device

• 2025 Inavation Awards - Best Communication & Collaboration Technology

Cybersecurity, Identity & Authentication

Protection, identity, access control, and threat management.

Intrusion protection

Wired and wireless intrusion protection devices

AJAX

AJAX Systems was founded in Kyiv, Ukraine, and has grown into Europe's largest manufacturer of professional security systems. The company operates globally, with production facilities in Ukraine and Turkey, and serves over 2.5 million users in 187 countries. It holds 38 patents for innovative technologies like Jeweller, Wings, OS Malevich, and advanced algorithms for intrusion detection and automation.

Product Lineup:

- **Intrusion Protection** - Wireless and wired alarm systems, motion detectors, and smart doorbells.
- **Fire and Life Safety** - Smoke, heat, and CO detectors integrated with automation.
- **Video Surveillance** - Smart switches, sockets, and water leak prevention systems.
- **Comfort and Automation** - Cameras and intelligent monitoring solutions.

• 2025 Benchmark Innovation Awards Winner

Engineered for Complete Data Control and Protection

Data
Compliance

Data
Resilience

Data
Protection

Introduced in 2024 with immediate, independent expertise. Directly from the U.S. leader in secure multi-cloud data resilience, Veritas Technologies. It helps organizations worldwide trust, access, and manage their data from creation to retirement.

Core Solutions:

- **Data Compliance** – End-to-end governance, eDiscovery, and risk prevention with AI-driven classification and automated policy enforcement.
- **Data Protection** – Comprehensive backup and cyber resilience through Backup Exec, safeguarding physical, virtual, and cloud workloads.
- **Data Resilience** – High availability and disaster recovery for mission-critical applications via InfoScale, ensuring uptime and rapid recovery.

Combat Insider Threat Intelligently

Redefining Your Business Functionalities

Controls Everywhere

Collect corporate information going out on various channels and portable devices. Maintain a record on employee activity on a daily basis.

Works Realtime

A daily update on data feed of what is being sent out and by whom.

Warns Proactively

Stay informed about probable data loss through desktops notifications, SMS alerts and email reports.

Superior Control

Identify and block sensitive corporate data right at the point of origin and save millions of dollars.

Data Resolve is a cybersecurity company specializing in insider threat management and data loss prevention solutions that help organizations protect sensitive information from internal and external risks. Headquartered in Noida, India, Data Resolve was founded in 2008 with a mission to strengthen enterprise security through proactive monitoring and control of data flow. Its flagship product, inDefend, offers comprehensive visibility into user activities, endpoint protection, data leakage prevention, and employee productivity analysis—making it a trusted solution for safeguarding business data and ensuring compliance.

• 2025 Data Breakthrough Awards - Data Privacy Solution of the Year, Data Security Solution of the Year, Data Security Platform of the Year

Secure E-Commerce, Trust HiTRUST

Founded in 1998 in Taiwan, **HiTRUST** is a leading provider of digital security, authentication, and payment technology solutions that help organizations secure digital interactions across banking, financial services, e-commerce, and enterprise environments. Serving customers throughout Asia Pacific, Europe, and Australia, HiTRUST enables businesses to strengthen digital trust through advanced identity verification, passwordless authentication, payment security, and fraud prevention solutions. Its technologies help protect against phishing attacks, credential theft, account takeover, and payment fraud while ensuring seamless and secure user experiences across mobile and web platforms.

Core Solutions:

- 3-D Secure
- Veri FIDO
- Payment Gateway
- Veri-id
- Digicert
- Loyalty Service

FOR A SAFER 360 WORLD

FUTURE-PROOF YOUR BUSINESS OPERATIONS with **AI-POWERED M365 SECURITY, DATA PROTECTION, COMPLIANCE & SECURITY AWARENESS**

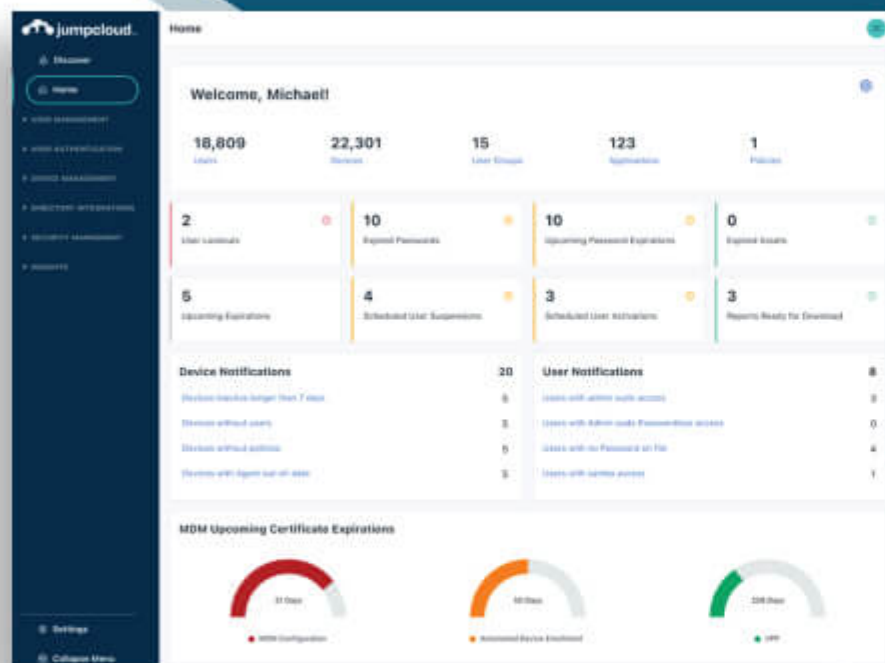

Hornetsecurity, founded in 2007 and headquartered in Hannover, Germany, is a leading cloud-security provider specializing in protecting Microsoft 365 email communications, data, and compliance. It operates in over 120 countries via more than 12,000 partners and MSPs, serving over 125,000 customers. Its product suite covers email security, archiving, continuity, encryption, advanced threat protection, and backup services—helping organizations focus on business by ensuring secure, reliable digital communication and compliance.

Core Solutions:

- **Email Security**
Advanced Threat Protection (ATP), spam/malware filtering, phishing and ransomware defense, email encryption, and archiving.
- **Compliance & Governance**
Audit-proof archiving, permission management, and data loss prevention.
- **Backup & Recovery**
Comprehensive M365 backup for mailboxes, Teams, SharePoint, OneDrive, plus VM and endpoint backup.
- **Security Awareness Training**
Automated phishing simulations and e-learning.

- 2025 CyberSecurity Breakthrough Awards - Email Security Solution of the Year
- 2025 Frost & Sullivan - Company of the Year award for strong performance in the Human Risk Management industry
- 2025 Radicati Group - Top Player in Secure Email – Market Quadrant 2025
- 2025 Expert Insight Awards - Winner of Winter Cybersecurity Awards

An Open Directory Platform to Connect All IT Resources

JumpCloud is a cloud-based open directory platform that unifies device, identity, and access management into one secure solution. It allows IT teams to manage user identities, control access, and enforce security policies across Windows, macOS, and Linux devices—all from a single platform.

Headquartered in Louisville, Colorado, USA, JumpCloud was founded in 2012 and continues to empower IT professionals worldwide with a centralized, scalable approach to identity and access management.

Core Solutions:

- **JumpCloud Directory Platform** – Centralized user identity and access control.
- **JumpCloud Device Management** – Unified endpoint management for all major operating systems.
- **JumpCloud SSO (Single Sign-On)** – Secure access to applications with one login.
- **JumpCloud MFA (Multi-Factor Authentication)** – Strengthened user verification across devices.
- **JumpCloud Cloud LDAP and RADIUS** – Cloud-based authentication for networks and applications.

- 2025 Golden Globew Award - 21st Annual Cybersecurity Awards
- 2025 CyberSecurity Breakthrough Awards - Endpoint Security Innovation of the Year

The Future of Data Management

LT ZERO Pte Ltd, founded on 16 January 2018 in Singapore, is a private company specializing in next-generation enterprise data management solutions. It focuses on delivering high-performance, AI-ready, and cost-efficient platforms that span the entire data lifecycle—from distributed file systems and NAS appliances to cloud-integrated tape libraries and archival systems. With strategic partnerships such as BDT Automation and its flagship Kumulus portfolio, LT ZERO positions itself as a trusted provider for organizations needing scalable, compliant, and resilient storage infrastructures.

Core Solutions:

KUMULUS STORAGE PLATFORM

High-speed storage designed for AI, HPC, M&E Workloads

- Kumulus Distributed File System
- Kumulus NVME NAS
- Kumulus Unified Storage

ARCHIVING

Designed for archiving and long-term data preservation.

- Archive in a Box
- ORION MC 6
- BD 340
- BD 680

S3 TAPE LIBRARY

Designed for On Premise Amazon Glacier equivalent

- S3 Tape Library
- **TAPE MEDIA**

Tomorrow's potential. Secured

Founded in 1990 in Boston, **OneSpan** is a global technology company that specializes in providing solutions for digital identity, electronic signatures, and transaction security to create trusted digital interactions. They offer software and services for high-assurance identity verification, e-signature workflows, and secure mobile applications to prevent fraud and ensure regulatory compliance for various industries, particularly financial services.

Product Lineup:

Digital Agreements

- Notary
- eSignature
- eSign Integrations
- Virtual Room
- Smart Rooms
- Identity Verification

Cybersecurity

- FIDO Authenticator
- Mobile App Security
- Cloud Authentication
- Mobile Authentication
- Authentication Servers
- Classic Hardware Authenticators

- Multifactor Solution of the Year
- SC Award for Best Mobile Security Solution
- CyberSecurity Breakthrough Award – Overall Mobile Security Solution of the Year

Uninterrupted Power. Unmatched Confidence.

Engineered by Phoenix for intelligent backup and system reliability.

Phoenix UPS, distributed across several markets including the Philippines, is manufactured by Cyber Energy Co., Ltd., a Taiwan-based ODM (Original Design Manufacturer) specializing in UPS systems. The company is headquartered in Taipei, Taiwan, while product manufacturing is carried out at its factory in Dongguan, China.

Product Lineup:

- Line-interactive UPS
- Phoenix Stavol AVR
- On-Line UPS

Modern businesses require secure, reliable, and easy-to-manage connectivity.

End-to-End WAN Solution for All Connectivity Needs

Founded in 2011, **RansNet** is a Singaporean technology company that develops end-to-end wide area network (WAN) connectivity solutions, particularly focusing on 4G/5G and software defined WAN (SD-WAN) technologies.

Product Lineup:

SD-Branch Series

The SD-Branch routers securely connect end points at branch/remote locations, over any wired and/or wireless WAN (4G/5G) backhaul, to the central application systems.

SD-WAN Gateways

The SD-WAN gateways terminate secure VPN tunnels with branch routers to encrypt end-to-end communications. Gateway can be software (VM) or hardware.

Hotspot Gateways

The Hotspot Gateways provide self-customizable captive portals with RansNet Cloud Ads Manager to enhance Wi-Fi security and monetize free Wi-Fi.

SD-WAN Orchestrator

The orchestrator (infusion) centralizes SD-WAN provisioning and network visibility, over a single pane of glass, mfusion can be cloud or on-premised hardware/VM.

Make IT Simpler, More Secure and Valuable

Sangfor Technologies, founded in 2000 and headquartered in Shenzhen, China, is a global leader in cybersecurity, cloud computing, and IT infrastructure. The company offers a broad portfolio of solutions including Hyper-Converged Infrastructure (HCI), Virtual Desktop Infrastructure (VDI), Next-Generation Firewalls (NGFW), Endpoint Protection, Secure Web Gateways, Secure Access Service Edge (SASE), XDR, MDR, and SD-WAN. Serving over 100,000 customers worldwide with more than 60 branch offices, Sangfor is trusted by organizations across government, finance, education, healthcare, and enterprise sectors, delivering secure, innovative, and intelligent IT solutions.

Cybersecurity products:

• Sangfor Athena Foundation Series

- Athena NGFW (Next-Generation Firewall)
- Athena EPP (Endpoint Protection Platform)
- Athena SWG (Secure Web Gateway)
- Athena NDR (Network Detection and Response)

• Sangfor Cloud Security Series

- Athena SASE (Secure Access Service Edge)
- Zero Trust Guard (ZTG)
- Secured Global Access (SGA)
- Endpoint Secure Access (ESA)

• Sangfor Athena Security Operations Series

- Athena XDR (Extended Detection and Response)
- Athena MDR (Managed Detection and Response)
- Security GPT

Cloud products:

• Sangfor's Hybrid Cloud Solutions

- Sangfor aSV - Server Virtualization
- Sangfor HCI - Hyper Converged Infrastructure
- Sangfor SKE - Kurbentes Engine (SKE)
- Sangfor aDesk - Virtual Desktop infrastructure (VDI)
- Sangfor MCS - Managed Cloud Service
- Sangfor's Storage Solution
- Sangfor aStor - Distributed Storage Solution

- 2025 13th Annual Global InfoSec Awards - Winner
- Representative Vendor in Gartner Market Guide for Full-Stack

Automating Cyber Hygiene. Securing What Matters.

A cybersecurity solution purpose-built around the concept of Cyber Hygiene—helping organizations continuously secure, clean, and maintain their IT environments through automation. It was developed to address the growing complexity of security management by not just identifying risks, but actively resolving them.

SecHard simplifies cybersecurity by acting like a digital health check-up and maintenance system for IT infrastructure. Unlike traditional security tools that only report vulnerabilities, SecHard automatically fixes misconfigurations, enforces security standards, and eliminates blind spots across servers, networks, and critical assets. By combining security hardening, privileged access control, asset visibility, and certificate lifecycle management, SecHard helps organizations stay secure, compliant, and operational with minimal manual effort.

Core Capabilities:

Small-Office Systems

- Automatically scans servers and network devices, then enforces global security benchmarks by adjusting configurations to block threats and reduce attack surfaces.

Asset Discovery

- Automatically identifies all connected devices and systems within the network, eliminating visibility gaps and unmanaged assets that could become security risks.

Privileged Access Management (PAM)

- Secures and controls access to high-privilege credentials through a centralized digital vault—ensuring only authorized users can access critical systems and sensitive data.

Certificate Management

- Monitors, tracks, and renews SSL/TLS certificates to prevent unexpected expirations that can cause service disruptions or security warnings.

Stop threats before they strike

Sophos is a global cybersecurity company that delivers advanced protection against ransomware, malware, and data breaches through AI-driven security solutions. Headquartered in Abingdon, Oxfordshire, United Kingdom, Sophos was founded in 1985 and has since become a trusted leader in cybersecurity for organizations worldwide.

Sophos with SecureWorks:

Managed Detection & Response (MDR), Taegis XDR platform and threat intelligence

Sophos with Arco Cyber:

Security control validation, risk & compliance mapping, CISO-level governance and reporting

Leading Solutions Include:

- **Sophos' AI-driven security platform** – (endpoint, network, email, and cloud protection)
- **Sophos Managed Detection and Response (MDR)** – 24/7 expert threat hunting and response service for proactive defense.
- **Sophos Central** – A unified cloud management platform for monitoring and managing all Sophos solutions.
- **Sophos Firewall** – Comprehensive network security with intelligent threat detection and control.
- **SecureWorks' Taegis XDR and MDR expertise** (Managed Detection and Response and Extended Detection and Response)
- **Sophos Endpoint 100** - security package for businesses with up to 100 users and 10 servers.

Engineered for stunning large-format results.

Reliable media solutions for technical and graphic printing.

Alps Paper is a brand of large format printing media established in 2015 by Svalbard Enterprise Inc. It was created to address the challenge of finding consistent, high-quality media suitable for large format printers, a problem the founders personally experienced in their own printing operations.

Driven by this need, the founders developed Alps Paper as a reliable solution not only for themselves but also for other industry professionals. The brand focuses on producing indoor large format media that delivers dependable performance and consistent print results.

Today, Alps Paper offers a range of indoor media products, including coated papers, bond papers, and films. Each product undergoes quality assurance testing to ensure compatibility with various large format printers, helping users achieve optimal output across different printing applications.

Product Lineup:

- 1. Alps Universal Bond Paper** - Ideal for precision CAD whiteprints and professional presentations. This 80gsm paper is designed for architectural, engineering, and manufacturing needs.
- 2. Alps Coated Paper** - Bright white coated paper engineered for high-impact visuals. Perfect for indoor posters, maps, and orthophotos.
- 3. Alps Photo Paper** - Instant-dry photo paper available in Matte, Glossy, and Satin finishes (190gsm & 260gsm). Designed for vibrant colors, sharp details, and smudge-free prints.
- 4. Alps Digital Blueprint Paper** - Specialized paper for architects and engineers, optimized for digital blueprinting.
- 5. Alps Natural Tracing Paper** - Premium tracing paper with a refined "onion-skin" texture and 90gsm weight. It offers transparency and resilience for blueprint reproduction, overlays, and technical layouts.
- 6. Alps Universal Artist Board** - A 220gsm board with a matte-glossy finish, compatible with dye and pigment inks. Ideal for school projects, business presentations, and creative posters.

Delighting You Always.

Canon

Canon Business Imaging Solutions (BIS) is part of Canon Inc., a global technology leader founded in 1937 in Japan. With decades of innovation in imaging, printing, and document management, Canon BIS focuses on delivering reliable, high-quality business solutions that improve productivity, workflow efficiency, and information management for organizations of all sizes worldwide.

Canon BIS provides a comprehensive portfolio of enterprise-grade printing, scanning, and document workflow technologies designed for modern businesses. Its solutions support small offices, mid-size organizations, and large enterprises by enabling efficient document capture, secure printing, optimized workflows, and high-quality output—whether for everyday office use or specialized large-format applications. Canon BIS combines dependable hardware, intelligent software integration, and sustainability-focused design to support digital transformation across industries.

Product line:

Small-Office Systems

- Compact and multifunction printers for SOHOs and small teams
- Optimized for affordability, space efficiency, and ease of use
- Ideal for everyday printing, copying, and scanning needs

Document Scanners

- High-speed desktop and production scanners
- Purpose-built for document digitization, archiving, and compliance
- Ideal for shared services, finance, healthcare, and government use

Corporate Systems

- Enterprise-class multifunction devices (MFPs)
- Designed for high-volume, networked office environments
- Ideal for everyday printing, copying, and scanning needs

Large Format Printers

- Wide-format printers for CAD, GIS, graphics, and technical drawings
- Precision output for architecture, engineering, construction, and design
- Supports high-resolution, color-accurate printing at scale

ENGINEERED FOR GOOD

Smart Transactions, Powerful Prints,
Brilliant Projections.

EPSON

Epson is a global technology leader known for pioneering innovation built on efficient, compact, and precision engineering. From creating the world's first compact digital printer and quartz watch, Epson delivers advanced solutions across printing, visual communications, wearables, and robotics-serving both businesses and consumers.

With over 30 years of presence in Southeast Asia and a strong regional base in Singapore, Epson supports customers through extensive service, solution, and manufacturing networks. In the Philippines, Epson has operated since 1996, continuing to provide high-precision, energy-efficient technologies that exceed customer expectations.

Product Lineup:

Point-of-Sale Printers and consumables

- Impact Dot Matrix Receipt Printers
- Thermal Desktop Receipt Printers
- Portable Receipt Printers
- Mobile Receipt Printers
- Label Printers
- Kiosk Printers

Large Format Printers and consumables

- Signage Printers
- Textile Printers
- Direct-to-Fabric
- Photo Printers
- Minilab Printers

Business Projectors

- Mid-brightness projectors
- High-brightness projectors

EMPOWER YOUR VISION

Redefining the Future of Self-Shopping

Datalogic originated in Bologna, Italy, founded in 1972 by Romano Volta. The company began with a focus on electronics before shifting toward barcode scanning and automatic data capture technologies.

In 1974, Datalogic produced the world's first fixed retail scanner, marking a major milestone in the industry. Over the years, it evolved into a global technology leader headquartered in Italy, with a strong presence across Europe, the Americas, and Asia. Today, Datalogic continues to serve key sectors such as retail, manufacturing, and healthcare with innovative data-capture solutions.

Product Lineup:

- 1. Fixed Retail Scanners (Magellan Series)** - High-performance barcode scanners for retail checkout, offering advanced 1D/2D scanning, AI-powered loss prevention, and energy-efficient designs.
- 2. Handheld Scanners (QuickScan Series)** - Compact, ergonomic scanners with patented technologies like 'Green Spot' for good-read feedback, optimized for mobile barcode reading and POS environments.
- 3. Mobile Computers** - Rugged devices for inventory management and in-store operations, integrating scanning and data capture for real-time workflows.
- 4. AI-Powered Solutions** - Embedded AI for loss prevention, product recognition, and shrinkage detection, helping retailers improve operational efficiency and protect revenue.

40
ANNIVERSARY

One Connection · Infinite Possibilities

D-Link, a global leader in the networking industry, began expanding worldwide in 1986 and was officially established as D-Link Corporation in 1987. With 90 operational and sales locations across 43 countries, D-Link provides innovative and reliable networking equipment, AI-powered cloud management services, and complete infrastructure solutions for individuals, homes, businesses, and industries.

Expand Your Connections – Purpose-Built Networking for AV over IP.

NETGEAR

NETGEAR, Inc. was founded in 1996 by Patrick Lo and Mark G. Merrill in San Jose, California. NETGEAR entered the Pro AV market in 2017 unlike traditional IT-centric networking gear, NETGEAR designed its Pro AV solutions from the ground up to meet the unique needs of AV professionals, simplifying multicast video, supporting protocols like SDVoE, Dante, AVB, NDI, and offering intuitive AV-focused interfaces.

Product Lineup:

• M4250 Series

AV Line switches for 1Gb AV over IP, rack-friendly design, PoE+ up to 90W per port, and silent operation.

• Engage Controller

AV-specific GUI for easy configuration and monitoring of multiple switches.

• M4350 Series

Enterprise-grade switches with 25G/100G uplinks, SMPTE ST 2110 support, and advanced security.

• Pro WiFi Access Points

Reliable wireless connectivity for AV environments, managed via NETGEAR Insight.

• M4500 Series

High-capacity switches for large-scale AV over IP with throughput up to 100G.

• 2025 PSNI Growth Driver Award

Compute *Smartly*.

NComputing

NComputing

Is an American brand and the world's fastest-growing desktop virtualization company, boasting more than 70,000 customers and 20 million daily users across 140 countries. Originating in San Mateo, California, the company introduced its initial product in 2003 and focuses on the Desktop Virtualization type of business, with its products distributed by WSI since 2018.

Product Lineup:

• L400, RX300+, RX420 (vSpace) • vSpace Pro Enterprise • vSpace Pro LTS	• Azure AVD/WVD/Win 365 • Microsoft RDS • RX420(RDP), EX500, LEAF OS	• Citrix DAAS/VDI • EX500 & LEAF OS • VMWare Horizon
• vSpace Pro Client for Windows & Chromebook		

Penguin Solutions—solving the complexity of AI.

PENGUIN
SOLUTIONS

Penguin Solutions is a global provider of advanced computing and digital infrastructure solutions, specializing in high-performance, edge, and mission-critical systems. A key part of its portfolio is fault-tolerant computing platforms, built to support environments where continuous availability, data integrity, and operational resilience are non-negotiable.

Through its fault-tolerant systems—widely deployed in industries such as manufacturing, energy, transportation, healthcare, and financial services—Penguin Solutions enables zero-downtime operations, even in the presence of hardware or software failures. These platforms are designed with redundant architectures, real-time error detection, and automated failover, allowing critical applications to run continuously without interruption or data loss.

Penguin Solutions combines deep expertise in always-on computing, edge deployment, and enterprise-grade support, making it a trusted partner for organizations that rely on uninterrupted operations for safety, compliance, and productivity.

Product Lineup:

Fault-Tolerant Platforms

- **Stratus ztC Endurance:**
Intelligent, Predictive, Fault-Tolerant Platforms

Confidently run complex software stacks with Stratus ztC Endurance's breakthrough 99.99999% availability, which enables information technology (IT) and operational technology (OT) staff to run critical applications with no downtime or data loss.

- **Stratus ftServer** is a fully integrated, continuously available platform uniquely engineered to run mission-critical applications without downtime or data loss—for the enterprise data center, control room, or remote edge location—helping companies maximize productivity and revenue.

- **Rugged Automated Zero-Touch Edge Computing Platform**

Designed for both operational technology (OT) and information technology (IT), Stratus ztC Edge is a zero-touch, secure, highly automated computing solution built for edge environments—easy to deploy and secure, easy to manage locally and remotely, and easy to maintain and service.

- **Stratus everRun** combined with industry standard x86 systems quickly and easily protects your always-on virtualized workloads and data.

Ultra Reliable Industrial Printing Solutions

PRINTRONIX
WHEN RELIABILITY COUNTS

Printronix's manufacturing headquarters, where their industrial printers are made, is in Malaysia, with other corporate offices located in the US, Europe, and Asia. Founded in 1974 and headquartered in Irvine, California, the company focuses on reliable printing products and solutions for the supply chain.

Product Lineup:

- **Line Matrix Printers (P8000 Series)**

- Configurations: Cabinet, Open Pedestal, Enclosed Pedestal, Zero Tear

- **Industrial Laser Printers**

- Models: LP654C (Letter/A4) and LP844C (Tabloid/A3)

- **Serial Dot Matrix Printers**

- Models: S828 and S809

Unlock the Full Potential of Your Data

Quantum

Quantum

is a US-based technology company with over 40–45 years of experience in data storage and management, specializing in helping organizations manage and unlock the value of large-scale, unstructured data. Quantum provides end-to-end data management and storage solutions designed for the AI era—enabling organizations to store, manage, protect, archive, and analyze unstructured data across its entire lifecycle.

Core Solutions / Product Lineup

Quantum offers a tiered, end-to-end data platform covering:

- **High-Performance Storage (Working Data)**
Ultra-fast file and object storage for AI, analytics, and data-intensive workloads
- **Data Protection & Backup**
Backup appliances and cyber-resilient solutions for fast recovery and ransomware protection
- **Archive & Long-Term Storage**
Cost-efficient object storage and tape solutions for long-term retention and data lakes
- **Data Management & Orchestration**
Solutions to catalog, index, and orchestrate unstructured data for easier access and reuse
- **Edge-to-Core-to-Cloud Infrastructure**
Flexible deployment across on-prem, hybrid, and cloud environments

All-Round Power Protection

SANTAK

SANTAK is an international power-electronics brand specializing in Uninterrupted Power Supply (UPS) system, founded in 1984 in china. SANTAK is known for independently develop UPS technologies focused on high reliability, robust design, wide input voltage tolerance, and intelligent power protection, serving industries such as data centers, telecommunications, finance, healthcare, manufacturing, transportation, and government infrastructure.

Product Lineup :

• Line-Interactive UPS • Online (Double-Conversion) UPS • Power Distribution Units (PDU)

Shuttle®

Shuttle specializes in the design and manufacturing of robust and IoT-ready small form factor PC, industrial PC, Panel PC, Kiosk, and face recognition integrated solutions.

Established in 1983, Shuttle Inc. has a solid foundation in manufacturing commercial and industrial computers. We believe that the core value of technology is the combination of technique, humans, and the environment. With years of experience, Digital Signage, Smart Retail, Surveillance, Infrastructure, IoT, Industrial Automation

ALWAYS LEADING ALWAYS INNOVATING

star

Star Micronics originated in Japan, where the company was founded in 1950. It initially focused on precision processing and the manufacturing of miniature components and machine tools, building a strong foundation in high-quality engineering and production.

As its capabilities grew, the company expanded into high-tech manufacturing, producing advanced components such as mobile phone transducers. This expertise later enabled Star Micronics to enter the point-of-sale (POS) printer market, applying its precision technology to reliable printing solutions.

Over time, Star Micronics leveraged its advanced manufacturing processes to develop a broad portfolio of POS printers and electronic components. Today, it is recognized as a global brand with a worldwide presence, serving retail and commercial markets across many countries.

Product Lineup:

- Dot Matrix POS Printers
- Thermal POS Printers
- Portable Receipt Printers
- Specialty Solutions: mC-Label3

WLAN Solution for Smart City

Sundry Technologies, founded in 2014 and headquartered in Shenzhen, China, is a leading provider of enterprise WLAN, smart switches, and cloud networking solutions. As a brand under the Sangfor Group, Sundry focuses on simplifying and securing network infrastructure to support digital transformation. Its comprehensive range of access points, controllers, switches, and X-LINK cloud services is designed for education, government, healthcare, commercial, and enterprise environments, ensuring reliable connectivity, enhanced security, and efficient network management.

NETWORK SMARTER, CONNECT FASTER

Teltonika was founded in Lithuania over 25 years ago and has grown into a global IoT technology leader. Headquartered in Vilnius, Lithuania, the company operates 36 offices in 26 countries and manufactures millions of devices annually in its state-of-the-art European facilities.

Teltonika specializes in IoT connectivity and networking equipment.

Product Lineup:

- IoT Platforms
- Custom Products
- Access Points
- Modems
- Routers
- Gateways
- Accessories
- Ethernet Switches
- Embedded Systems
- Remote Management Systems

Architecture of Continuity

Critical digital infrastructure solutions for data centers, networks, and industrial environments.

Vertiv originated as part of Emerson Network Power before becoming an independent company in 2016. It is headquartered in Westerville, Ohio, USA, and operates globally, focusing on critical digital infrastructure solutions for data centers, communication networks, and commercial/industrial facilities. The company provides solutions that safeguard critical IT infrastructure, enabling businesses to maintain reliable performance and adapt to future demands.

Product Lineup:

- 1. Uninterruptible Power Supply (UPS) Systems** - Includes Vertiv™ Liebert® series: line-interactive and online UPS solutions for desktops, servers, and enterprise IT environments.
- 2. Power Distribution Units (PDUs)** - Advanced rack and floor PDUs for efficient power management in data centers and edge environments.
- 3. Integrated Solutions: Vertiv™ SmartCabinet™** – a compact, all-in-one IT infrastructure solution for small server rooms and edge deployments.
- 4. Monitoring and Management Software** - Tools for remote monitoring, network management, and predictive analytics to maintain uptime and performance.
- 5. Racks and Enclosures** - Secure and scalable rack systems for housing IT equipment in enterprise and edge environments.

Anywhere. Everyday.

Verbatim was founded on April 28, 1969, by Reid Anderson as information terminals corporation in Mountain View, California. Verbatim first made its name as a pioneer in the development of floppy disks and optical media technology. We have drawn upon that technological legacy to develop an extensive selection of data storage devices, computer peripherals and accessories, LED lighting and gaming solutions. All of these product lines are renowned throughout their industries for exceptional quality, performance, and reliability. Today, we continuously reach toward the potential of tomorrow.

I.T. runs on BMC

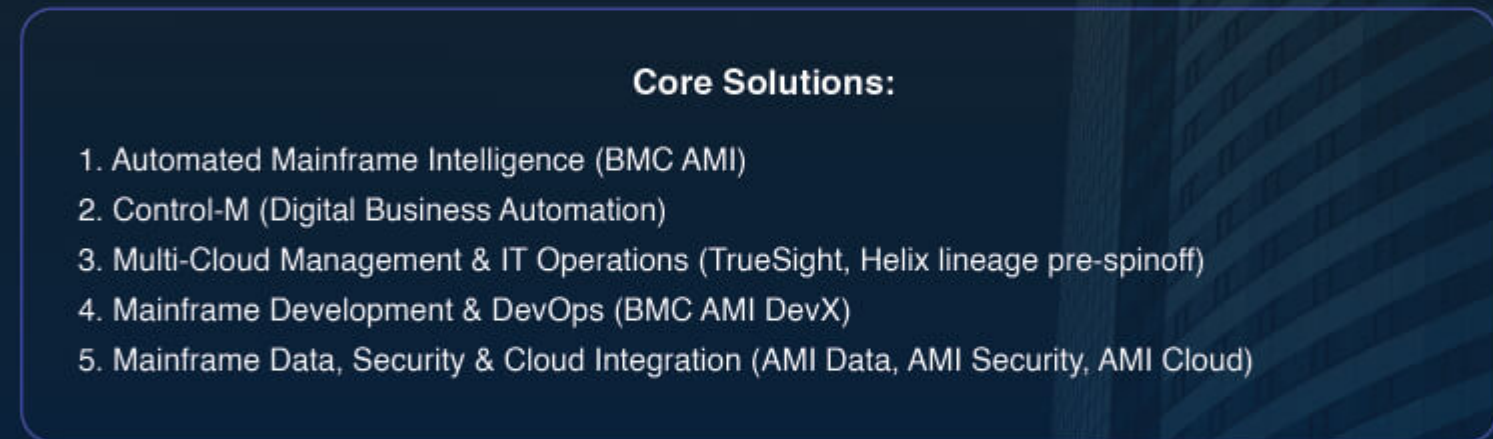

Make the most of your data and move at unstoppable speed with AI and automation that unifies, simplifies, and transforms the entire multi-cloud enterprise.

I.T. runs on BMC

Make the most of your data and move at unstoppable speed with AI and automation that unifies, simplifies, and transforms the entire multi-cloud enterprise.

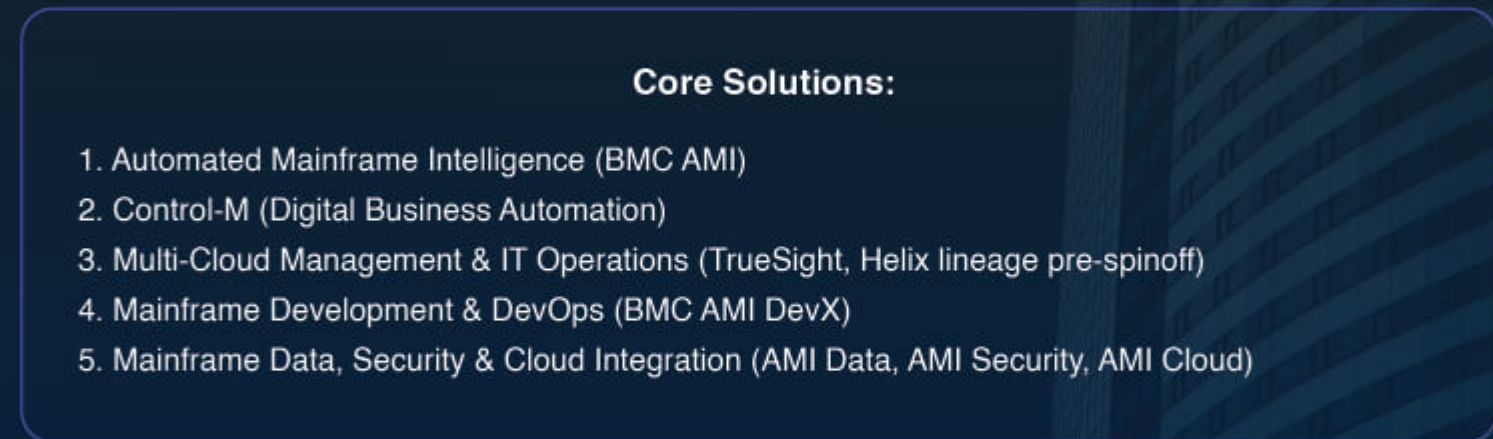

BMC Software is an American multinational enterprise software and IT services company founded in 1980 in Houston, Texas, by former Shell employees Scott Boulette, John Moores, and Dan Cloer—whose initials formed the company name. Originally focused on IBM mainframe software, BMC has evolved into a leading provider of automation, operations, and service-management solutions that help global enterprises optimize, secure, and modernize their hybrid IT environments. Today, BMC supports organizations worldwide with AI-driven infrastructure software, connecting people, systems, and data to accelerate digital transformation.

Core Solutions:

1. Automated Mainframe Intelligence (BMC AMI)
2. Control-M (Digital Business Automation)
3. Multi-Cloud Management & IT Operations (TrueSight, Helix lineage pre-spinoff)
4. Mainframe Development & DevOps (BMC AMI DevX)
5. Mainframe Data, Security & Cloud Integration (AMI Data, AMI Security, AMI Cloud)

-

Intellyx Digital Innovator Award (2024)

AI that works as hard as you do.

BMC Helix helps the world's most forward-thinking IT organizations unlock human potential and multiply productivity.

Launched in the United States in 1980, **BMC Helix** is a cloud-native platform for IT Service Management (ITSM) and AIOps that uses artificial intelligence, automation, and predictive analytics to streamline IT operations and enhance service delivery. Applied across industries worldwide, BMC Helix enables organizations to operate more efficiently, resolve issues faster, and deliver scalable, proactive service experiences in hybrid and multi-cloud environments.

Core Solutions:

1. Helix ITSM (IT Service Management)

A flagship, enterprise-grade ITSM solution delivering complete, ITIL-aligned service lifecycle management. Designed for modern, intelligent, and scalable service operations.

2. Helix AIOps & Observability

An intelligent, AI-powered operations layer that transforms monitoring into actionable insight through deep analytics and automated event correlation.

3. Helix Operations Management

A unified view of operational performance, enabling precise control and optimization of hybrid cloud environments.

4. Helix Discovery & Configuration Management

A powerful, automated discovery engine that builds a real-time, accurate picture of your hybrid and multi-cloud ecosystem.

5. Helix Digital Workplace/ Employee Self-Service

A modern, consumer-like digital workplace delivering seamless self-service and an intuitive support experience for employees.

6. Helix Discovery & Configuration Management

A powerful, automated discovery engine that builds a real-time, accurate picture of your hybrid and multi-cloud ecosystem.

World-class visualization solutions helping you share ideas, optimize workflows, and create immersive experiences.

chaos

Chaos was founded in 1997 in Sofia, Bulgaria by Peter Mitev and Vladimir Koylazov as Chaos Group, initially focusing on simulation and rendering software. The company launched its first major product, V-Ray, in 2002, which became an industry standard for photorealistic rendering.

Chaos develops visualization and rendering solutions that empower architects, designers, and artists to create photorealistic and immersive experiences. Its ecosystem includes V-Ray (high-end photorealistic rendering engine), Corona (intuitive renderer for architectural visualization), and Enscape (real-time rendering and VR plugin). These tools integrate seamlessly with leading 3D modeling platforms like 3ds Max, SketchUp, Revit, Rhino, and Cinema 4D, enabling workflows from concept design to final visualization.

Secure the Work

Secure every app, user, and device. High-performance access to enterprise applications is made possible, with Citrix.

Citrix Systems, Inc

Is an american multinational software company specializing in cloud computing, virtualization, and networking technologies. Founded in 1989 in Richardson, Texas by Ed Iacobucci, Citrix pioneered remote access solutions and has evolved into a global leader in digital workspace technologies. Its headquarters is now located in Fort Lauderdale, Florida, USA, with development centers worldwide, including Canada, Germany, India, and the UK.

Product Lineup:

- Application Virtualization & VDI
- Citrix Analytics
- Citrix Managed Desktop
- Citrix Workspace
- Enterprise Mobility Management (EMM)
- File Sync and Sharing
- Networking (Citrix ADC / NetScaler)

- 2025 Microsoft Partner of the Year Finalist
- CXANZ - Citrix Partner Appreciation & Awards
- Citrix "Preferred Services Partner" Accreditation - Partner Award

Protecting data from the *cyber threats* of today and tomorrow

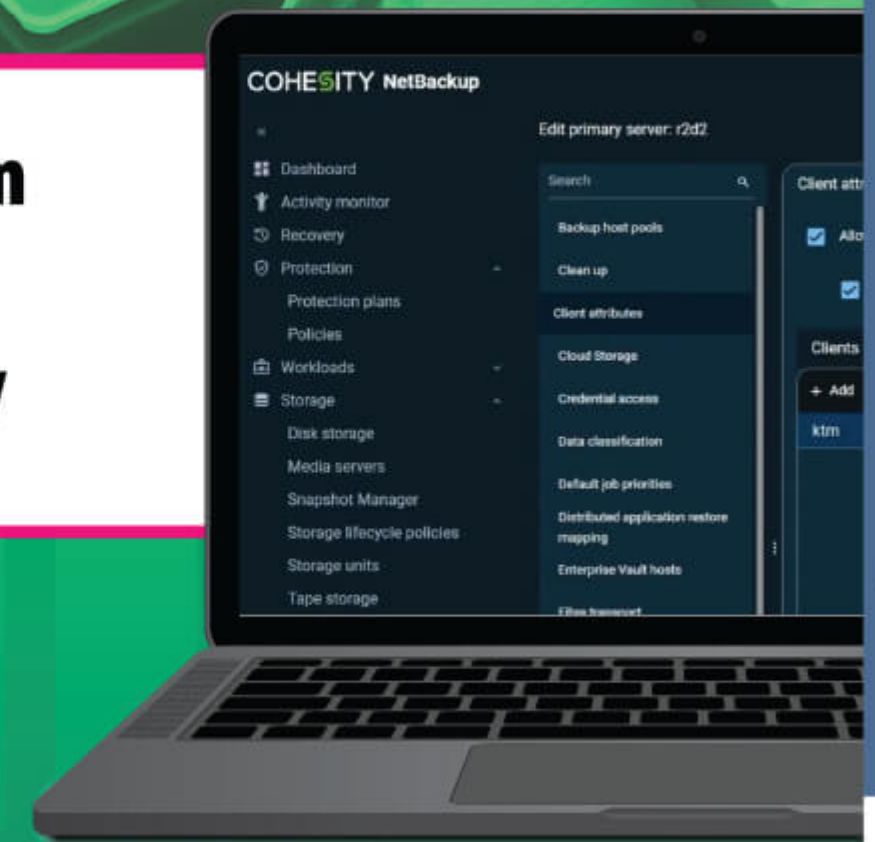

DATA PROTECTION

DATA SECURITY

DATA INSIGHTS

COHESITY

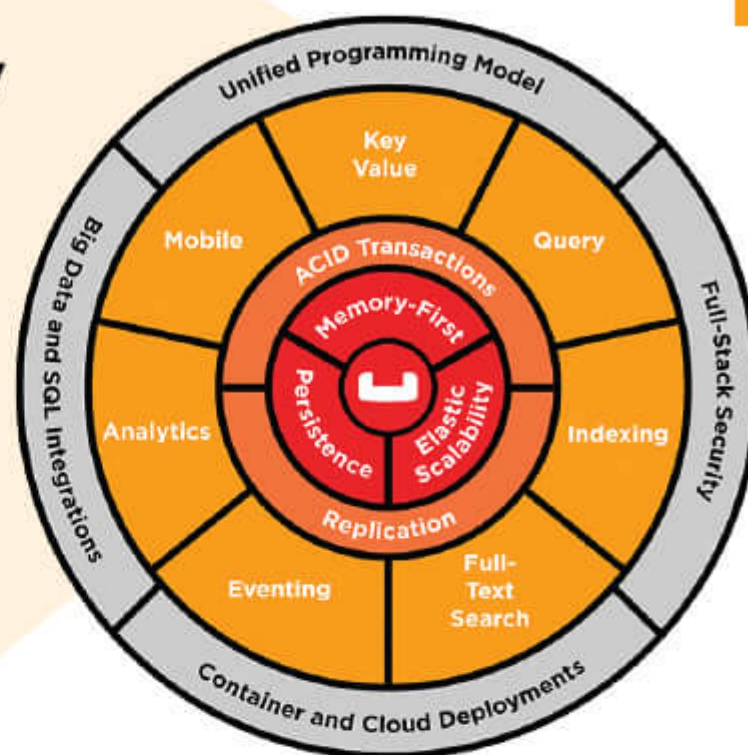

Cohesity was founded in June 2013 by Mohit Aron in Santa Clara, California, with a vision to radically simplify data management by consolidating fragmented secondary data silos. Cohesity has grown into a global leader in AI-powered data security and management, serving more than 13,600 customers, including 70% of the Global 500, and protecting hundreds of exabytes of data.

Core Solutions:

- **DataProtect**
Enterprise backup and recovery for on-prem, edge, and cloud workloads.
- **Helios**
SaaS-based global management console for unified control.
- **FortKnox**
SaaS-based cyber vaulting for immutable backups.
- **SiteContinuity**
Automated disaster recovery and failover orchestration.
- **DataHawk**
Cyber resilience with ransomware detection, cyber vaulting, and ML-based threat analysis.
- **SmartFiles**
Software-defined file and object services for unstructured data.
- **Cohesity Gala**
Generative AI assistant for data insights and threat investigation.

- 2025 Gartner Magic Quadrant - Best in Backup and Data Protection Platforms

The AI-Ready Database for Every Deployment

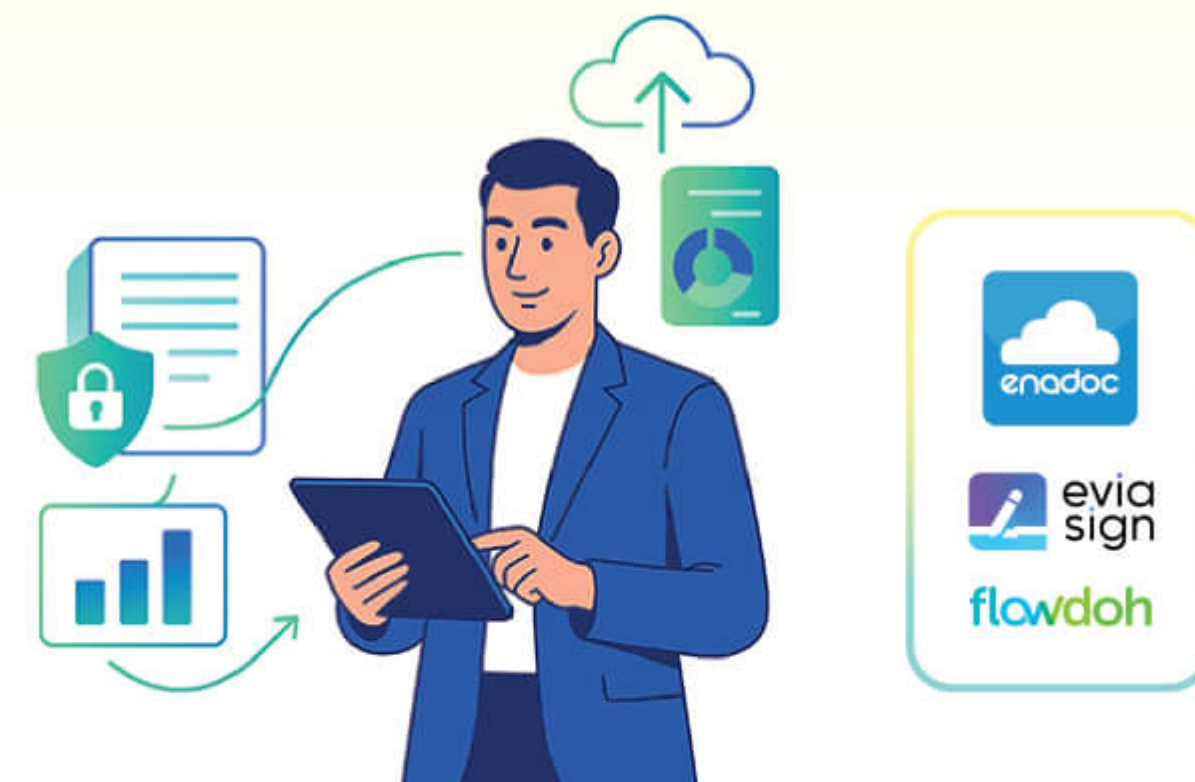

Couchbase is a modern database company that provides a powerful, scalable, and high-performance NoSQL database designed for enterprise applications. It enables organizations to manage and deliver data across cloud, edge, and on-premises environments with speed and flexibility. Headquartered in Santa Clara, California, USA, Couchbase was founded in 2011 and continues to empower developers and businesses with a database built for the modern digital era.

Core Solutions:

- **Couchbase Server**
A distributed NoSQL database delivering high availability and scalability.
- **Couchbase Mobile**
Enables offline-first mobile and edge applications with real-time data sync.
- **Couchbase Capella**
A fully managed cloud database-as-a-service (DBaaS) for simplified deployment and management.
- **Couchbase SDKs and Tools**
Provide developers with APIs, connectors, and integration capabilities for seamless app development.

• 2025 Data Breakthrough Awards - Winner of Data Management Platform

Building a **paperless** future.

enadoc

Enadoc, established in 2013 in Singapore, is a leading provider of document management solutions dedicated to helping organizations move toward a paperless and more efficient workplace. Its innovative platform supports secure storage, streamlined workflows, secure signing, and integrated workflows. Enadoc offers three key products — Flowdoh, EviaSign, and the Enadoc Document Management System — empowering businesses to modernize processes and boost productivity.

Solutions Lineup:

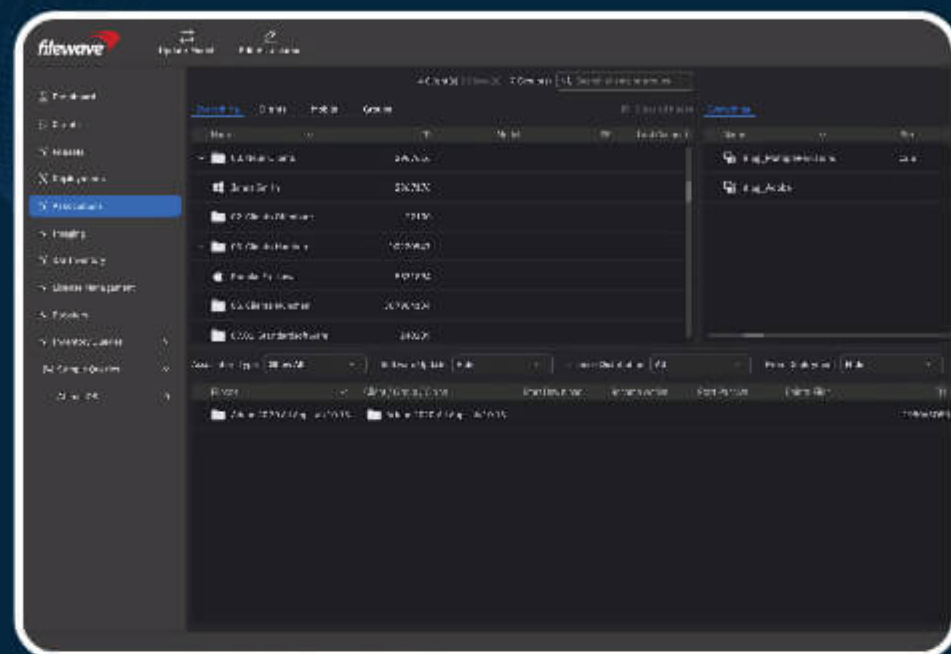

Enadoc is a cloud-based document management system that helps businesses go paperless by securely storing, organizing, and retrieving documents, with features like advanced search, workflow automation, e-signatures, and strong security.

EviaSign – secure eSignature platform that streamlines digital document signing and tracking with cloud-based, compliant workflows.

Flowdoh – low-code BPM and workflow automation platform by Enadoc that streamlines operations by automating processes and reducing manual tasks.

Deploy. Manage. Done.

Simplify management of **macOS, iOS, Windows, ChromeOS, and Android** devices through one unified platform. FileWave ensures secure, compliant, and efficient operations - no matter how large or distributed your fleet.

Founded in 1992 in Switzerland, **FileWave** is a leading Mobile Device Management (MDM) and Unified Endpoint Management (UEM) solution designed to help IT departments efficiently manage, monitor, and secure devices across multiple operating systems. With cross-platform support at its core, FileWave enables IT teams to maintain full visibility and control over diverse device environments from a single, centralized platform.

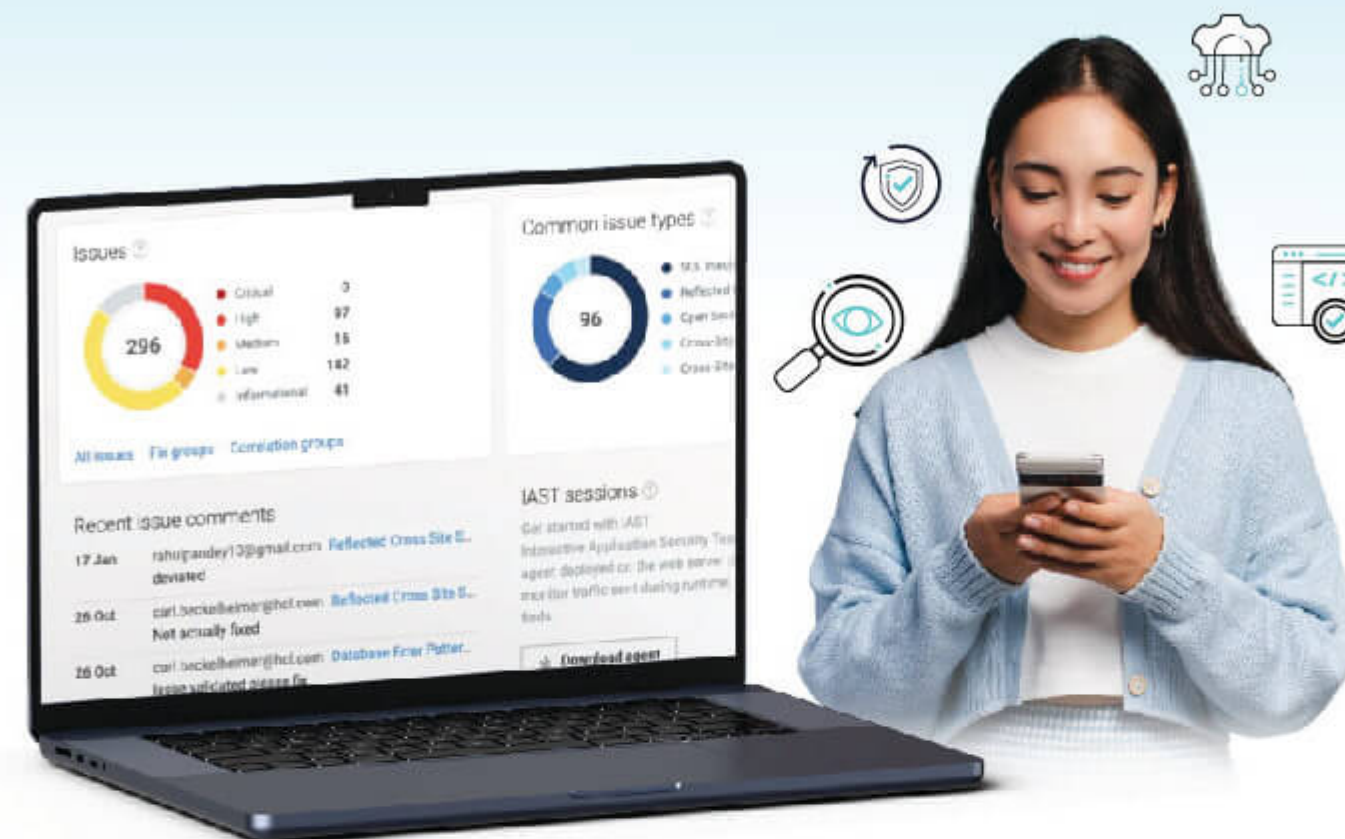

With over three decades of industry leadership, FileWave is a pioneering MDM and UEM platform trusted by organizations worldwide. Its proven expertise empowers IT departments to streamline operations, enhance security, and adapt seamlessly to evolving workplace technologies.

Core Solutions:

- Device Management
- Provision and Deploy
- Software Distribution
- Patch Management
- Self-Healing
- Remote User Support
- Self-Service Kiosk
- Fileset Technology

• FileWave Achieves Prestigious ISO 27001 Certification

From just ACAD to BricsCAD

BricsCAD

BricsCAD is developed by Bricsys NV, founded in 2002 by Belgian CAD entrepreneur Erik de Keyser. Headquartered in Ghent, Belgium, Bricsys started with the mission to create cost-effective, mission-critical CAD tools. In 2018, Bricsys became part of Hexagon AB, a global industrial technology leader, enabling BricsCAD to grow into a worldwide solution available in over 110 countries and 14 languages.

Product Lineup:

- **BricsCAD Lite** – High-performing, compatible and concise 2D drafting and detailing.
- **BricsCAD Pro** – Powerful, intuitive and interoperable 2D/3D CAD and modeling.
- **BricsCAD BIM** – AI-driven BIM built on a compatible 2D and 3D design platform.
- **BricsCAD Ultimate** – Powerful and seamless workflows, from BIM to Mechanical design.
- **BricsCAD Mechanical** - Mechanical design and drafting combined with intelligent 2D, 3D and modeling.

• 2025 buildingSMART IFC4 Certification • 2025 France Global Industries Award

Empowering every person and organization

Microsoft

originated in the United States in 1975 when Bill Gates and Paul Allen founded the company to develop software for personal computers. It has since evolved into a global technology leader known for operating systems, productivity software, cloud computing, and artificial intelligence solutions.

Core Solutions:

- Microsoft Azure
- Microsoft Dynamics 365
- Microsoft 365 / Microsoft Office Productivity Suite
- Microsoft Power BI
- Microsoft Security
- Microsoft Windows Operating System
- Microsoft Windows Server
